PROFILE

Computer Science student at Tec de Monterrey (GPA 94/100, graduating May 2028). Experience with SQL database design, REST APIs and Python, and with Excel for event and fundraising budgets. Winner of the Ideathon Teletón 2026. Vice President of the CS student society, peer mentor, and former Python and English teacher.

TECHNICAL SKILLS

Programming: Python, SQL, C++, JavaScript/TypeScript, HTML/CSS
Data: Excel (intermediate-advanced), Power BI (learning), SQL/MySQL (schema design, stored procedures)
Tools: Git/GitHub, Linux/Bash, VS Code, Claude (code review, test design, research)

EDUCATION

Tecnológico de Monterrey (ITESM) · degree conferral Jun/Jul 2028 — 2024 - May 2028 (expected)
B.S. in Computer Science and Technology. GPA 94/100. Relevant coursework: MA1042 Mathematics and Data Science for Decision Making (Excel), Data Structures, OOP (C++), Databases, Software Engineering, Web Development, Embedded Systems & IoT.

Rotterdam International Secondary School (RISS), Netherlands — 2022 - 2024
IB Diploma: 33/45, taught in English. Excellence in English Award. Head of Charity: led fundraising campaigns, including Buy a Tulip, Help a Girl (raised €2,000) and Red Cross disaster relief for Turkey & Syria; tracked campaign budgets in Excel.

RELEVANT PROJECTS

Mexican Savings & S&P 500 Analysis | Power BI, DAX, Python, Excel — In progress
- Modeled after-tax returns for 33 savings products from 12 Mexican banks, SOFIPOs and fintechs, plus CETES and the S&P 500, including ISR withholding, the 5-UMA exemption and deposit-protection limits. At 200,000 MXN for a year, a split strategy nets ~12.4% vs 6.3–8.7% for any single product (github.com/sant-mell/sofipo-savings-powerbi).

Rex | Overall Winner of 11 teams, Ideathon Teletón 2026, Mexico City — Sep 2026
- Built the working prototype for a five-person team: a gamified routine assistant (Python + JavaScript) for children with cognitive disabilities and their caregivers, from idea to pitch in 2 days.

The Fool's Descent | JavaScript, Node/Express, MySQL
- Team project: roguelike deckbuilder on a custom engine, with a 28-endpoint REST API and a 745-line MySQL schema with 20 stored procedures.

Parallel DFA Syntax Highlighter | Python
- Hand-built DFA lexer (explicit transition table, no regex), parallelized across 16 cores: 6.2× faster on 60 files / 8 MB.

Aquaroute | START Hack Mexico (36-hour hackathon)
- Water-truck routing prototype combining satellite climate data with a Dijkstra-based algorithm, built in 36 hours.

DT Construct ICS | Freelance Client Website (dtc-ingenieria.com)
- Designed and shipped a live site for a Mexican construction company (HTML, CSS, JavaScript, Leaflet maps); managed the client directly.

WORK EXPERIENCE

IT Consumer Intern | Philip Morris México (Pro Meritum), Mexico City — Nov 2026 - May 2027 (expected)
Hybrid internship supporting IT for consumer-facing digital platforms and services, 30 hours a week alongside full-time studies.

English Language Teacher | Pro English BV, Rotterdam — Jul 2025 - Aug 2025
Taught English to 165 children (ages 4-12) using immersive, play-based methods.

Python Instructor (ages 12-16) | Logaritmia MX — Feb 2025 - Jul 2025
Designed and taught a Python curriculum for secondary-school students covering variables, loops, conditionals, functions, and problem solving, including assessment and feedback.

Media Logistics Assistant | DPG Media Nederland — Jun 2022 - Aug 2022
Optimized last-mile print distribution routes for NRC, De Telegraaf, and AD under strict daily time constraints.

LEADERSHIP & ACTIVITIES

Vice President, SATI, the Computer Science (ITC) student society at Campus Santa Fe: sponsorships, a hackathon (built its cost budget in Excel), community building, and company visits for new students (in progress).

Peer Mentor, Tec de Monterrey (since 2nd semester): mentored 40+ first-year students across several engineering majors.

Tec de Monterrey teams: Advanced Competitive Programming Team and Cybersecurity Team.
